Re: CONSULTANCY SERVICES FOR THE REVIEW AND UPDATE OF NATIONAL ENERGY POLICY, STRATEGIES AND ACTION PLAN

Your Ref: GM-NAWEC-243443-CS-QCBS
BCQ 109/267/01(8)

Dear Sir:

In reference to the above consultancy, we confirm having received your letter of 10th October. As discussed in a call with Peter Mendy today (11th October) it appears there may have been some confusion concerning the phases of work and the deliverables. The project has three work phases but 4 deliverables and as per usual practice we had understood the inception report, which is the first of these deliverables, would establish how the project would be conducted in line with the terms of reference and contract. The inception report we developed does not, and was not intended to, relate to phase 1 of the work but instead the Project Initiation phase. We had intended phase 1 of the work to be delivered as part of the Interim report, by doing this we could dedicate more time to reviewing the actual situation within The Gambia.

As per our call today I want to apologise for any confusion that has arisen and underline our intention to ensure we deliver The Gambia a National Energy Policy, Strategies And Action Plan which applies international best practices whilst also being relevant and applicable to The Gambia. As regards the existing energy policies, strategic objectives, plans and programmes which we received from you on September 22nd and subsequent dates, we are currently reviewing these and will bring this work forward to incorporate within an updated version of the inception report, rather than the interim report, as per your request.

Yours sincerely,

David Auty
